

Crashkit - Alpha

You're a pilot, but your friends call you the mountain man. You spend your weekends building shelters from twigs and branches using only your pocket knife and already know how to survive out in the woods. You have experience and knowledge needed for survival, and not just from what you've learned from the latest Discovery Channel show. You realize you don't need more than the basics, knowing that the most important tool in the field is your brain, and you know how to use it.

The 'Alpha' Personal Aviation Kit is designed for you. Small and incredibly compact, we have included 44 of the most essential items needed to survive. The kit includes basic first aid, light, fire, signal, shelter and methods for providing clean water and food procurement. The kit is small enough to be carried on the person in a cargo pocket or bag and weighs merely 730grams (1.61lbs). While small, water resistant and crushproof, this kit still exceeds all Transport Canada requirements for aviation survival. And with every item tried and tested to ensure it will work flawlessly for you when you need it most, you can count on the tools you need, when you need them

Crashkit 'Alpha' Product Specifications	
Dimensions 'Alpha 1020':	66.82" x 4.75" x 2.12"(17.3 x 12.1 x 5.4 cm)
