

Crashkit - Bravo

You're a pilot, and have watched a couple of survival shows on TV. You know how to amaze your friends with your fire starting abilities and have a very basic knowledge of wilderness survival. You might need a few more essentials than others, but you still realize that the most important tool in the field is your brain, and you know how to use it.

The 'Bravo' Personal Aviation Kit is designed for you. Small and compact, we have included 76 of the most essential items needed to survive. The kit includes basic first aid, light, fire, signal, shelter and methods for providing clean water and food procurement.

The kit is slightly thicker than the Crashkit 'Alpha', but still small enough to be carried easily in small flight bags, jacket pocket, glove compartment, map pouch or cargo pants pocket. Crashkit 'Bravo' weighs in a 1.6 Kilos or 3.52lbs.

While water resistant, crushproof and relatively small, this kit still exceeds all Transport Canada requirements for aviation survival. And with every item tried and tested to ensure it will work flawlessly for you when you need it most, you can count on the tools you need, when you need them.

Crashkit 'Bravo' Product Specifications	
Dimensions 'Bravo 1050':	19.05 x 12.86 x 7.94cm (7.50" x 5.06" x 3.13")
Weight:	1.6 kg or 3.7 lbs
